Access and Logging-in

Access and Logging-in

To access **GT Estimate** you must do so by introducing the following site address in your browser:
<https://estimate.mygtmotive.com>

Introduce the **Customer Number**, **User ID** and **Password**, and click on **“Login”**:

GT Estimate

The Home Page

The Home Page: The Estimates List

In the Home Page of **GT Estimate** you will see a list of all the estimates that you have created. On each line you'll be able to see such details as the **Estimate Number, Vehicle Registration Number, Make, Model, Start Date** (Estimate creation date), Modification Date and both the **Job Status** and **Estimate Status** (Whether the estimate is Calculated, Not Calculated, etc...):

Estimates list					
Search		Order: Start date from		New estimate	
Estimate No copy	User Code CUSTOMER GT MOTIVE ENGLAND - dmorris - GtEstimate	Reg. No	Make VOLKSWAGEN Model POLO (6R) 3/5D (09-)	Start Date 18/09/2014 11:09:00 Mod. Date 05/04/2016 08:04:00	Job Status Open Status Not calculated

The Home Page: User Data and Password

By clicking on the menu icon situated in the top left hand corner of the screen, a menu will be deployed where you can access your **"User Data"** where you'll find information regarding the **"Language"**, **"Country"** to which the database that you are using pertains to, and you can **change your password**:

The Home Page: Log-out

Also, in the menu that is deployed by clicking on the menu icon situated in the top left hand corner of the screen, you can access the **"My Operations"** and **"Work Environment" (My Profile)** areas of GT Estimate, and **Logout** once you have finished working with the application:

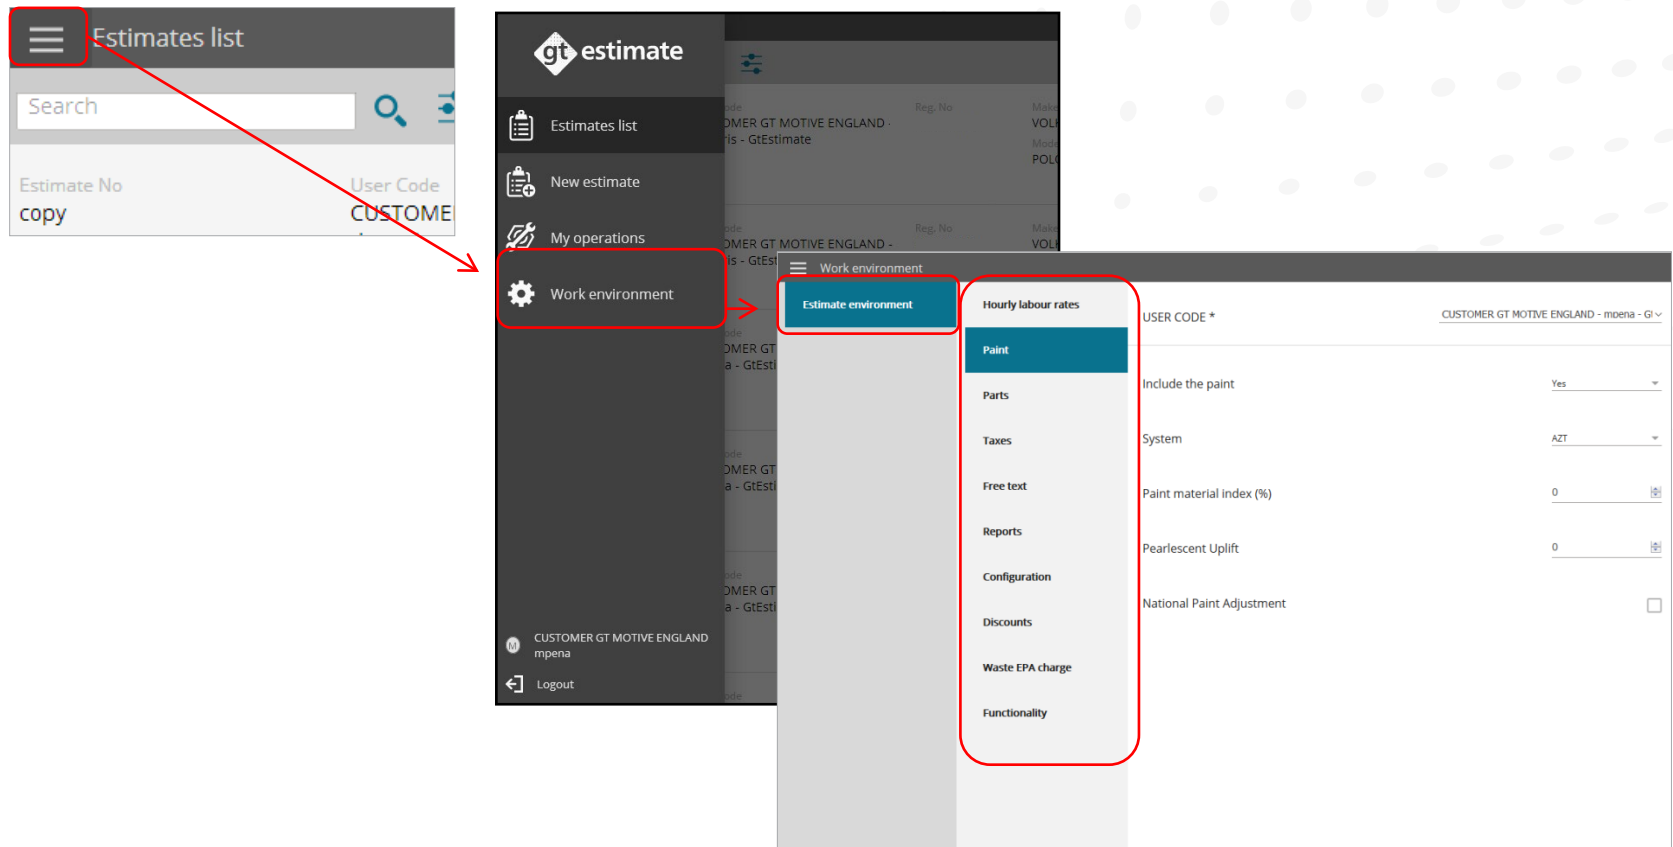

GT Estimate

Work Environment (My Profile)

Estimate Environment (My Profile)

By clicking on the menu icon situated in the top left hand corner of the screen, a menu will be deployed where you can access the **"Work Environment" (My Profile)** area of GT Estimate.

In this section the User you can set-up and establish the default values that will appear in GT Estimate every time a new estimate is created, such as the **Hourly Labour Rates, Paint Information, Parts, Taxes, Free Text, Reports, Configuration, Discounts, Waste EPA Charge and Functionalities**:

Estimate Environment: Hourly Labour Rates

Select the **User Code (Profile)** you wish to set-up or modify in the top left hand corner of the screen, and then set-up/modify the **Labour Rate** to your needs, taking into account the **Skill Level (T1, T2, T3...)** and the type of task (**Mechanics, Panel, Paint, Electrical or Trim**):

The screenshot shows the 'Hourly labour rates' configuration screen. On the left is a sidebar with a menu containing: Estimate environment, Hourly labour rates (highlighted), Paint, Parts, Taxes, Free text, Reports, Configuration, Discounts, Waste EPA charge, and Functionality. The main area has a header 'Work environment' and a sub-header 'Estimate environment'. Below this is a 'USER CODE *' field with a dropdown menu showing 'CUSTOMER GT MOTIVE ENGLAND - mdena - GI'. The main content area contains a table with skill levels (T1, T2, T3) and task types (Mechanics, Panel, Paint, Electrical, Trim). Each cell in the table contains the value '40' and a small up/down arrow icon. The table is highlighted with a red border.

T1	40	40	40	40	40
T2	40	40	40	40	40
T3	40	40	40	40	40

Estimate Environment: Paint

Select whether you would like **paint information** to be included in your estimates in the section **"Include Paint"**.

Select the paint system that you want to appear by default in all your estimates from the drop down menu. Choose from: **Manual, Manufacturer, Without Paint or AZT**.

Introduce a percentage amount for **Paint Material Index, Pearlescent Uplift** and mark whether you would like the **National Paint Adjustment (AZT only)** to be applied:

The screenshot displays the 'Estimate environment' configuration page. On the left, a sidebar lists various settings: 'Estimate environment' (selected), 'Hourly labour rates', 'Parts', 'Taxes', 'Free text', 'Reports', 'Configuration', 'Discounts', 'Waste EPA charge', and 'Functionality'. The 'Paint' option under 'Estimate environment' is highlighted with a red box. The main content area, also outlined in red, contains the following settings:

- USER CODE ***: CUSTOMER GT MOTIVE ENGLAND - moena - GI ▾
- Include the paint**: Yes ▾
- System**: AZT ▾
- Paint material index (%)**: 0 [icon]
- Pearlescent Uplift**: 0 [icon]
- National Paint Adjustment**: ☐

Estimate Environment: **Parts**

Select and predefine all the parameters regarding the parts information:

Price data, Use of Parts Suppliers, Parts Suppliers, Parts Options, Parts Platform Filter (%), Suggested Part Selection, Preselection of the Cheapest Part, Auxiliary Operations, Sundry Parts (Amount), Sundry Parts (%), Cheaper Part Multi-reference Selection:

Hourly labour rates	USER CODE *		CUSTOMER GT MOTIVE ENGLAND - moena - GtEstimate
Paint			
Parts	Price data	Current	
Taxes	Use of Parts suppliers	No	
Free text	Parts Suppliers		
Reports	Parts platforms		
Configuration	Parts platform filter (%)	0	
Discounts	Suggested part selection		
Waste EPA charge	Preselection of the cheapest part		
Functionality	Auxiliary operations	Both	
	Sundry parts (Amount)	0	
	Sundry parts (%)	2	
	Cheaper part multireference selection		

Estimate Environment: Taxes

Select and predefine whether you would like to **Delete Tax** from the estimate, the **Type of tax** and the **Value (%)**:

The screenshot shows the 'Taxes' section of the Estimate Environment. The left sidebar contains a list of menu items: 'Hourly labour rates', 'Paint', 'Parts', 'Taxes' (highlighted with a red box), 'Free text', 'Reports', 'Configuration', 'Discounts', 'Waste EPA charge', and 'Functionality'. The main content area is titled 'USER CODE *' and shows 'CUSTOMER GT MOTIVE ENGLAND - moena - GtEstimate'. Below this, there is a red-bordered box containing three fields: 'Delete tax' with an unchecked checkbox, 'Type' with a dropdown menu set to 'VAT', and 'Value' with a dropdown menu set to '20'.

Menu Item	Delete tax	Type	Value
Hourly labour rates			
Paint			
Parts			
Taxes	☐	VAT	20
Free text			
Reports			
Configuration			
Discounts			
Waste EPA charge			
Functionality			

Estimate Environment: Free Text

In the **Free Text** area of GT Estimate, you can include certain information in the estimate to your needs.

To the left of the screen you can set-up the **titles** of these Free text Fields that you want to appear in GT Estimate, and complete said information once inside the estimate itself. This area is sometimes used to include information regarding the customer details as shown below:

The screenshot displays the 'Free Text' section of the GT Estimate interface. On the left is a sidebar with the following navigation items: 'Hourly labour rates', 'Paint', 'Parts', 'Taxes', 'Free text' (highlighted with a red border), 'Reports', 'Configuration', 'Discounts', 'Waste EPA charge', and 'Functionality'. The main content area has a header with 'USER CODE *' and a dropdown menu showing 'CUSTOMER GT MOTIVE ENGLAND - moena - GtEstimate'. Below the header, a red-bordered box highlights the 'Customer Details' section, which includes the following fields: 'Name:', 'Address:', 'City/Postcode:', and 'VIN:'. Each field is followed by a horizontal line for text entry. To the right of the red box, there are four additional horizontal lines for text entry.

Estimate Environment: Reports

In the **Reports** section you can set-up how the final report of the estimate is viewed and upload a logo to appear as the report header and/or footer.

You can establish whether the details of each operation included in the estimate will be visible in the report by clicking on **"View Operations details"**, and/or **"Hide the Report Labour Table"**.

You can also upload a header or footer to the report by clicking on **"Upload image"**.

The screenshot displays the 'Work environment' interface. On the left, a sidebar contains a menu with 'Reports' highlighted. The main area is titled 'Logos for the reports' and contains two sections: 'Logos for the reports' and 'Logos for the foot of the reports'. Each section has a 'Choose logo' button and an 'Upload image' button. The 'Logos for the reports' section also includes a 'View operations detail' checkbox (checked) and a 'Hide report labour table' checkbox (unchecked). The 'Logos for the foot of the reports' section is currently empty.

Estimate Environment: Configuration

In Configuration you can establish the **“Default Functional Group”** that will appear first when a new estimate is created, you can establish how the **Estimate Id is** generated (Choose between: **Correlative Numbering, Correlative Numbering putting the year before, Correlative Numbering putting the year/month before, or Correlative Numbering putting the year/month/day before**) and the Start Number:

Estimate Environment: Discounts

Configure in this section the **Discounts** that will be applied as default discounts in the estimates:

Hourly labour rates			
Paint	On total		0 %
Parts	On parts		0 %
Taxes	On labour		0 %
Free text	On paint total		0 %
Reports	On paint material		0 %
Configuration	On paint labour		0 %
Discounts	I/D Job (%)		
Waste EPA charge			
Functionality		Apply To All Jobs	v
		Mechanic	0 v
		Paint	0 v
		Panel	0 v
		Trim	0 v
		Electrical	0 v
	I/D Part (%)		v
		Apply To All Parts	v
	Paint Materials		0 v

Estimate Environment: Waste EPA Charge

Configure information regarding the **Waste EPA (Environmental Protection Agency) Charge** that will be applied as default values in the estimates:

Hourly labour rates	USER CODE *		CUSTOMER GT MOTIVE ENGLAND - moena - GtEstimate
Paint			
Parts	Used oil EPA charge	Do not apply	▼
Taxes	Value	0	▲▼
Free text	Used tyres EPA charge		
Reports	Management type	Do not apply	▼
Configuration	Tyre type		▼
Discounts	Value	0	▲▼
Waste EPA charge			
Functionality	Other waste EPA charge	5	▲▼

Estimate Environment: Waste EPA Charge

The parameters that can be configured in this section are as follows:

Used Oil EPA Charge: Introduce information regarding Oil EPA charge.

- **Type:** Choose between the following options: **Do not apply, Cost per litre (pence) or Fixed Cost.**
- **Value:** Introduce a value according to the option selected above.

Used Tyres EPA Charge: Introduce information regarding used tyres EPA charge.

- **Management Type:** Choose between the following options: **Do not apply, Unit cost or Fixed Cost.**
- **Tyre Type:** Choose type of tyre.
- **Value:** Introduce a value according to the option selected above.

Other Waste EPA Charge: Introduce any other EPA charge the user may wish to include in the estimate.

- **Value:** Introduce a value to be applied to any other EPA charge.

Estimate Environment: Functionality

In **Functionalities** you can set-up/configure certain parameters regarding how GT Estimate functions, such as:

Whether you want the **pre-calculation of the operation to be visible in the Operations Screen**, whether you want **GT Estimate to work in “Full Estimate Mode” or “Query Mode”**, whether you want the **VIN Query Function to be launched automatically when you carry out a Registration Number (VRN) request**, can all be pre-defined among other things in this section:

The screenshot displays the 'Work environment' configuration interface. The 'Estimate environment' section is active, showing a list of settings on the right and a sidebar on the left. The 'Functionality' tab in the sidebar is highlighted with a red box. The settings on the right include:

- USER CODE *: CUSTOMER GT MOTIVE ENGLAND - moena - GtEstimate
- View PreCalculation: ☒
- Display part prices: ☒
- Mode: Full estimate mode (dropdown)
- VIN Query use: ☒
- Automatic Vin Query with registration number service: ☐
- Use of parts platforms: ☐
- Automatic query to the Platform upon calculation: ☐
- Use of Manual Times: ☐
- I/D values apply only as discounts: ☐
- Multiple operations selection window (Gt Hybrid): ☐
- Parts Suggestion (Gt Hybrid): ☐
- Action blocked by default: ☐

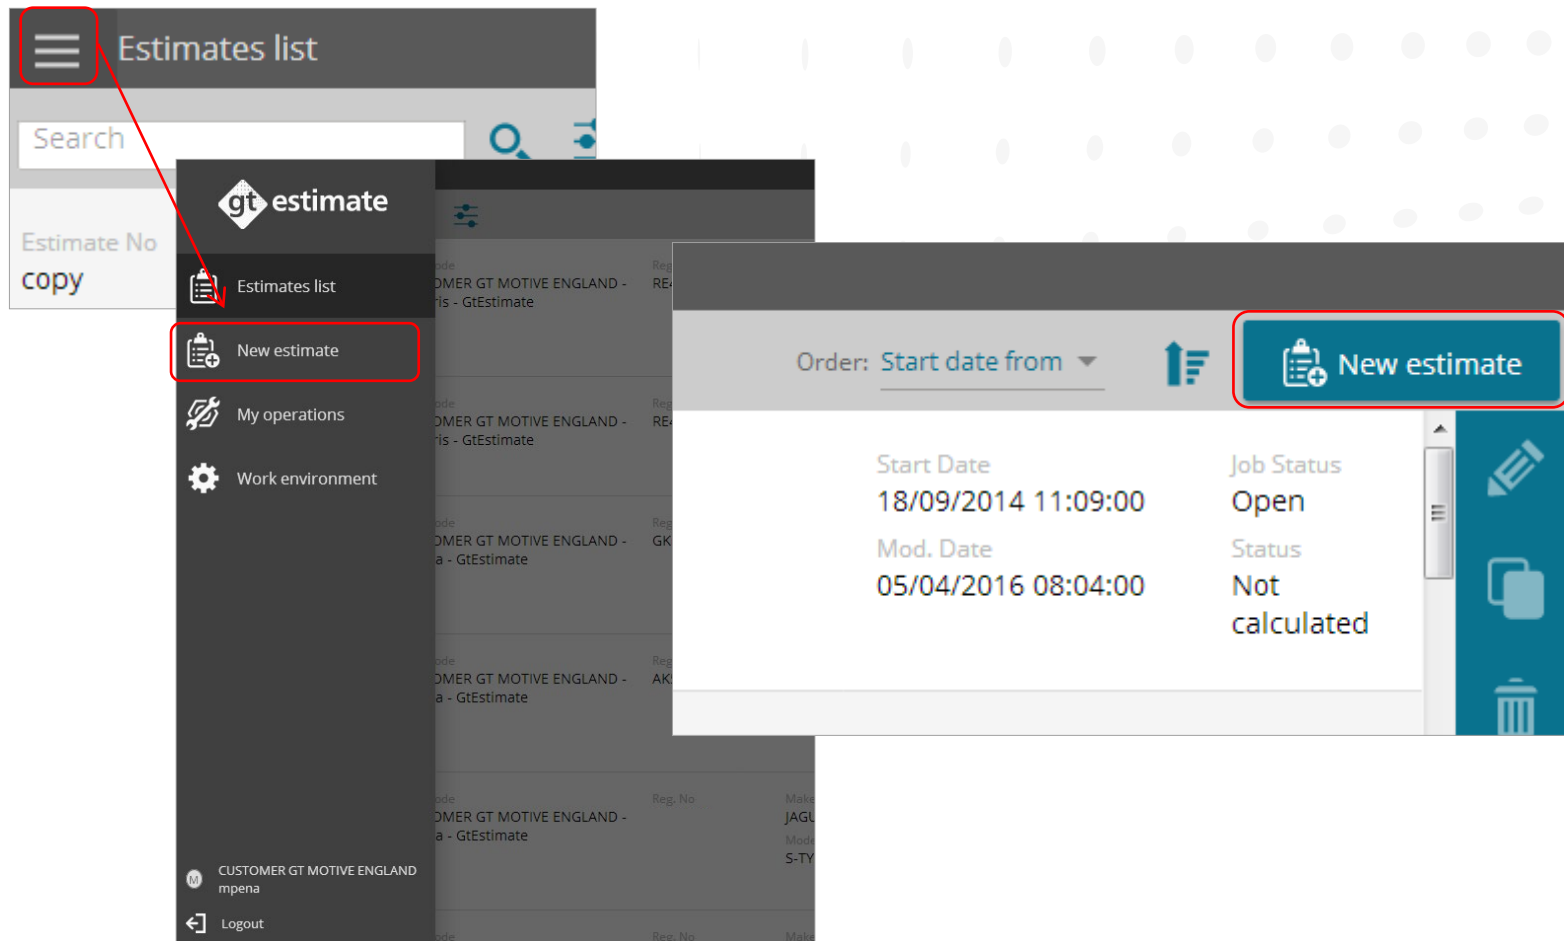

GT Estimate

Creating a New Estimate

Creating a New Estimate

To create a new estimate you can do so by either going to the menu icon situated above to the left and clicking on **"New estimate"** from the menu that is deployed, or you can click on the **"New estimate"** icon situated above to the right in the estimates list:

The Vehicle Identification Screen

When you create a new estimate you will be lead to the **“Vehicle Identification Screen”** where you should first introduce the **Estimate Id**, the **User Code** you wish to work with and **Reference Number of the estimate (Optional)**, and then click on **“Create Estimate”**:

The screenshot displays the 'Vehicle Identification Screen' within the GT Motive software. The interface features a dark grey header bar with a hamburger menu icon and the text 'Information'. A vertical sidebar on the left contains several icons: a blue circle with a white 'i' (highlighted with a red box), a car icon, a star icon, a document icon, a calculator icon, and a camera icon. The main content area is light grey and contains a form with three fields: 'ID *' with the value '223', 'USER CODE *' with a dropdown menu showing 'CUSTOMER GT MOTIVE ENGLAND - mpena - GtEstimate', and 'REFERENCE' which is empty. A red box highlights the entire form area. In the top right corner, there is a blue button labeled 'CREATE ESTIMATE' also highlighted with a red box. A small blue bar on the right side of the screen contains a download icon and a question mark icon.

The Vehicle Identification Screen

Next, the **Vehicle Information** part of the screen will be deployed where you should introduce all the necessary information regarding the **Reg. Number, VIN Number, Make, Model and Millage**:

The screenshot shows the 'Vehicle Identification' screen in the GT Motive app. The sidebar on the left contains icons for 'Information', 'Vehicle', 'Equipment', 'Data', 'Operations', 'Calculate', and 'Pictures'. The 'Vehicle' icon is highlighted with a red box. The main content area is titled 'Information' and displays the ID '223asdasda'. Below this, there are fields for 'USER CODE *' (CUSTOMER GT MOTIVE ENGLAND - mpena - GtEstimate), 'REFERENCE', and a 'VEHICLE' section. The 'VEHICLE' section is highlighted with a red box and contains fields for 'REG. NO *', 'VIN', 'MAKE *', 'MODEL *', and 'MILES' (0). A red box also highlights the 'Vehicle' icon in the sidebar.

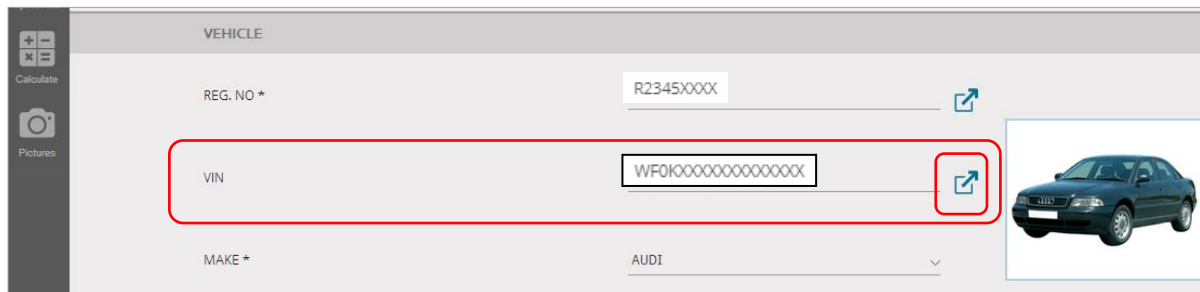

Note.: All the fields marked with an " * " are obligatory.

VRN Look-up & VIN Query

If you introduce the **Vehicle Registration Number (VRN)**, by clicking on the  icon, you can obtain the VIN Number from the National Ministry of Transport (**VRN Look-up function**):

Once you have obtained the VIN Number, click again on the  icon next to the VIN Number field, to carry out a **“VIN Query”** request, whereby **GT Estimate** will obtain all the vehicle equipment information from the manufacturer servers, such as the **make, model, bodywork, engine, gearbox, manufacture date, equipment, etc...** The amount of information available depends on the manufacturer:

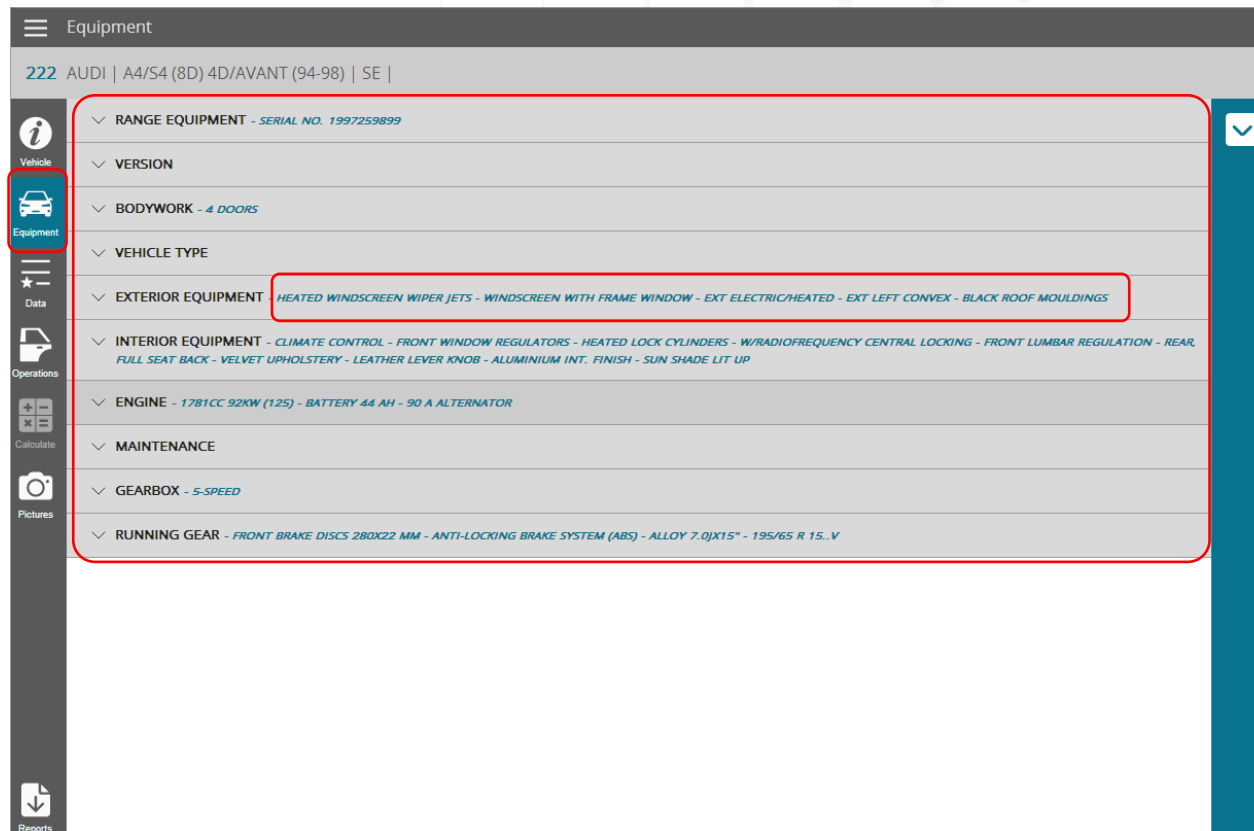

The Equipment Screen

The next step is to go to the **"Equipment"** Screen, where you should identify all the equipment that the vehicle has in each of the different sections.

If you have carried out a **VIN Query** request in the previous screen, this information will be filled-in by the application.

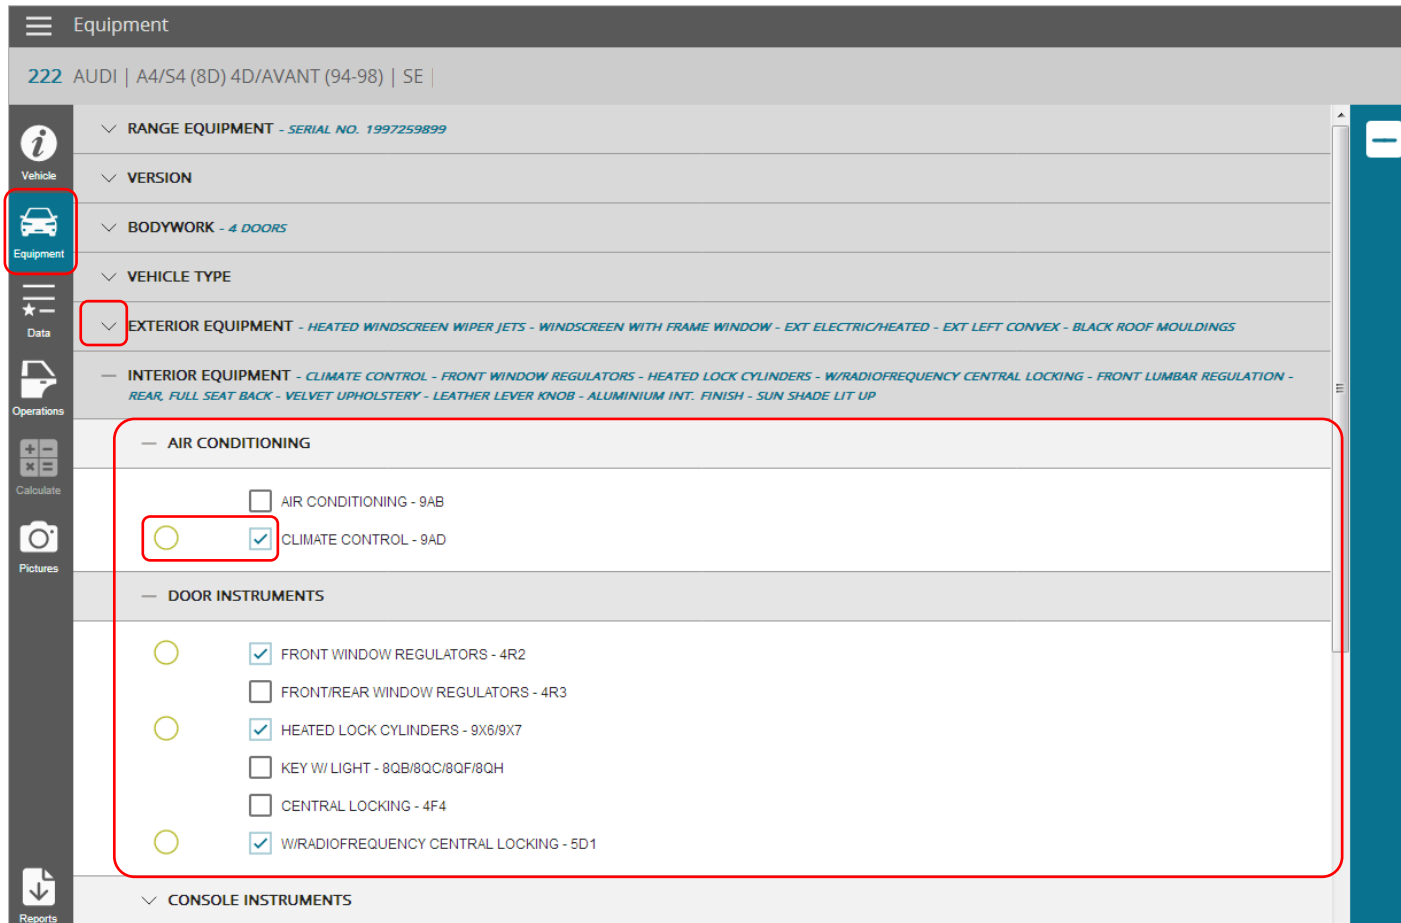

Next to the title of each section, the equipment that has been selected can be viewed in *italics*:

The Equipment Screen

Each of the sections can be deployed further by clicking on the  icon.

If a **VIN Query** request has been carried out, all the equipment that has been identified by the manufacturer will be marked and highlighted with a green circle. If this function has not been used, or is not available, then the vehicle specific equipment must be identified manually by the User:

☆ T3	40	40	40	40	40

Remember that all this information should / may have been previously set-up by the User in the **"Work Environment" (My Profile)** section of the Home Page. From here you can make changes to said information for this particular estimate.

The Estimate "Data"

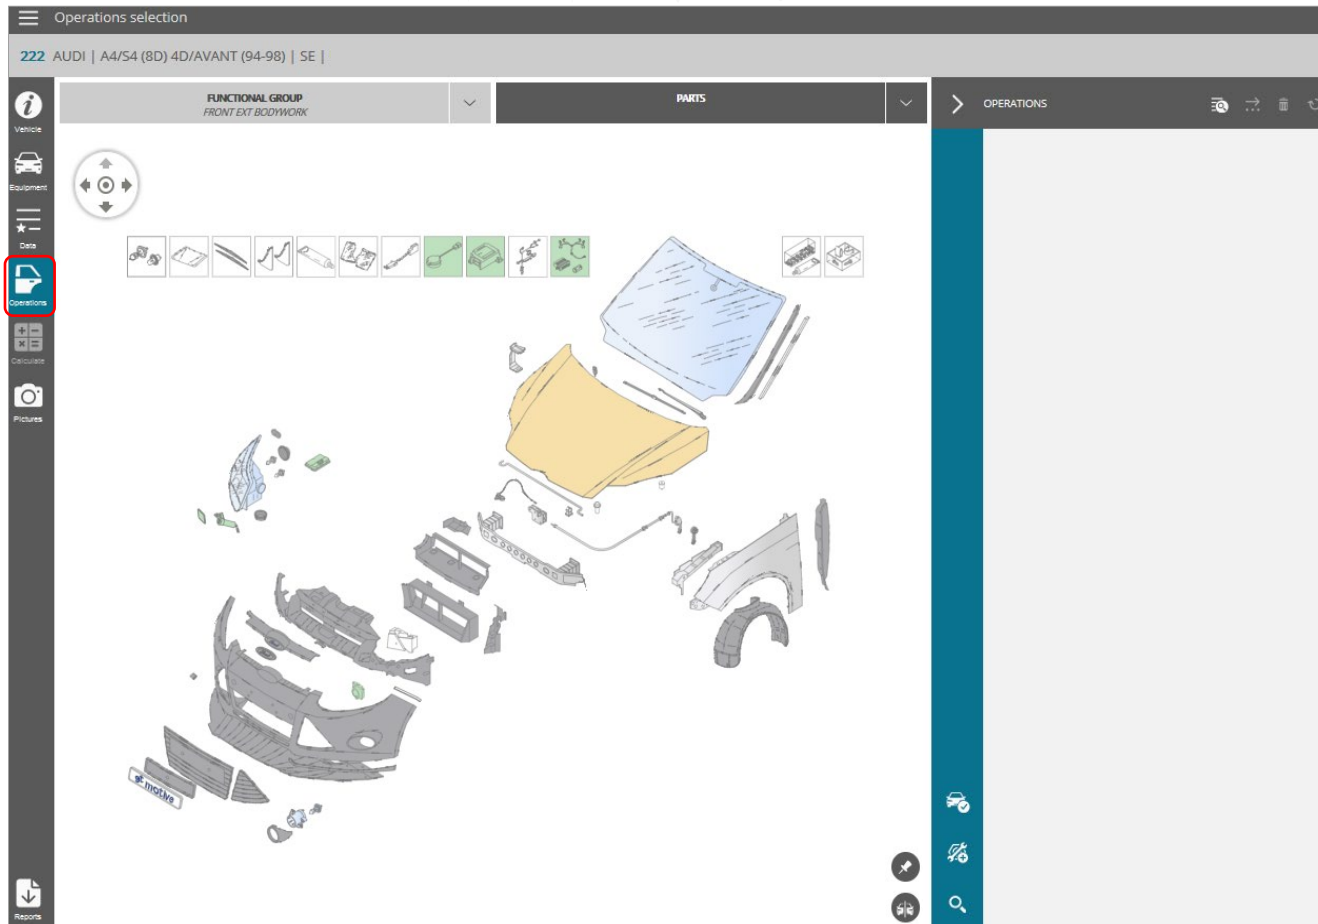

You can select certain specified areas of the **"Data"** screen as your **"Favourites"** by clicking on the star icon situated to the left of each field. Once you have selected your most frequently accessed fields as your favourites, by then clicking on the **"Favourites"** icon situated to the right, only those fields you have to concentrate on will appear. Click on **"View All"** at the top right hand corner of the screen to see all the **"Data"** areas again:

The Operations Selection Screen

Next, you should go to the **"Operations Selection"** screen by clicking on the **"Operations"** icon situated to the left.

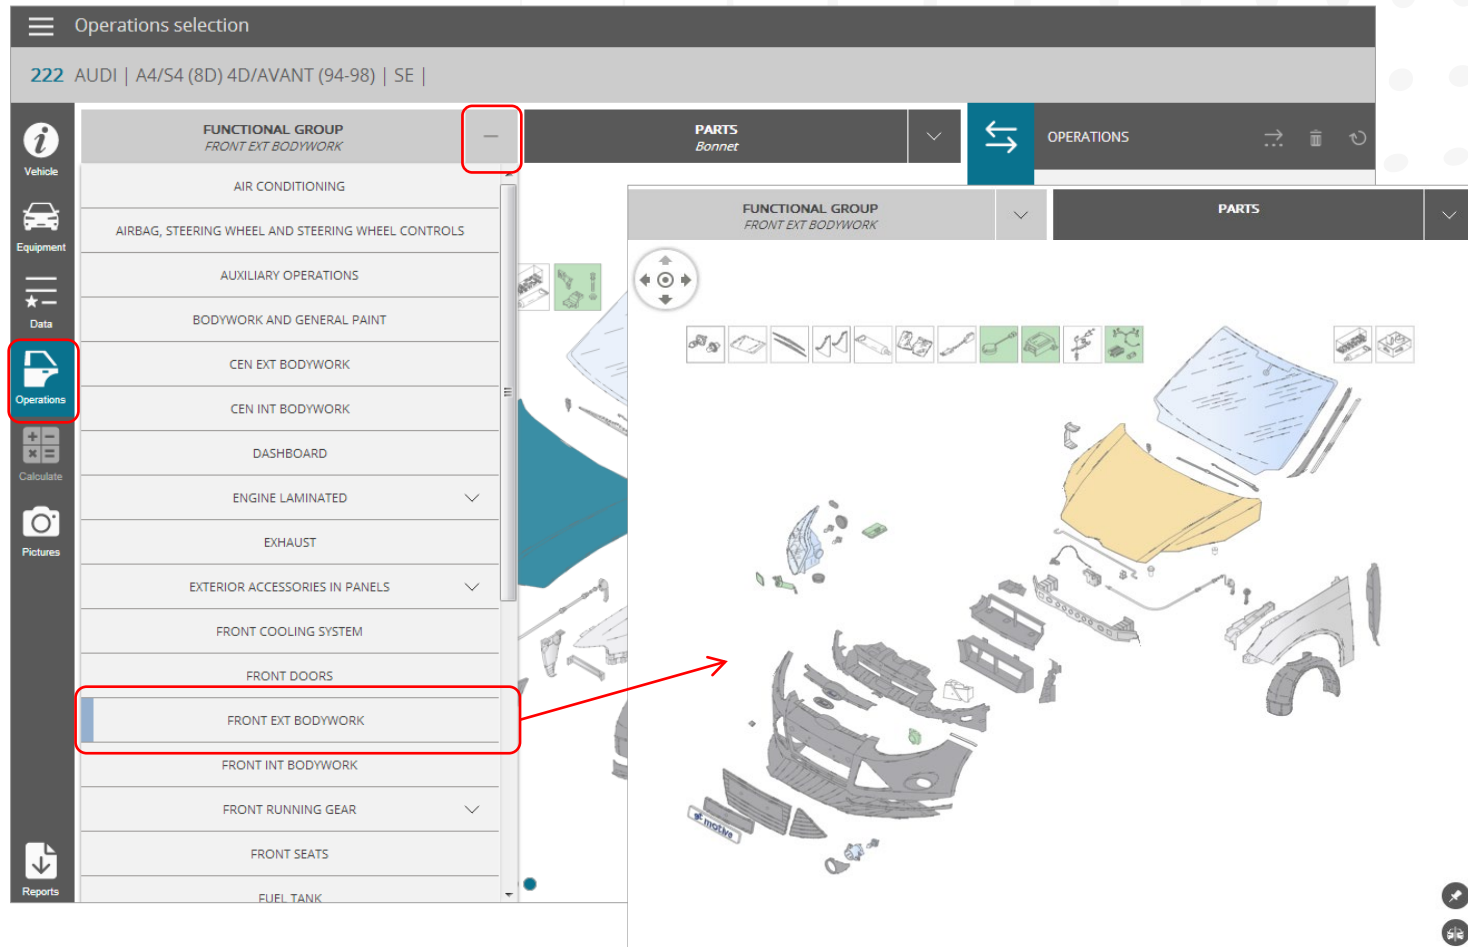

It is in this screen where you should add all the necessary items, operations and/or services to the estimate:

The Operations Selection Screen

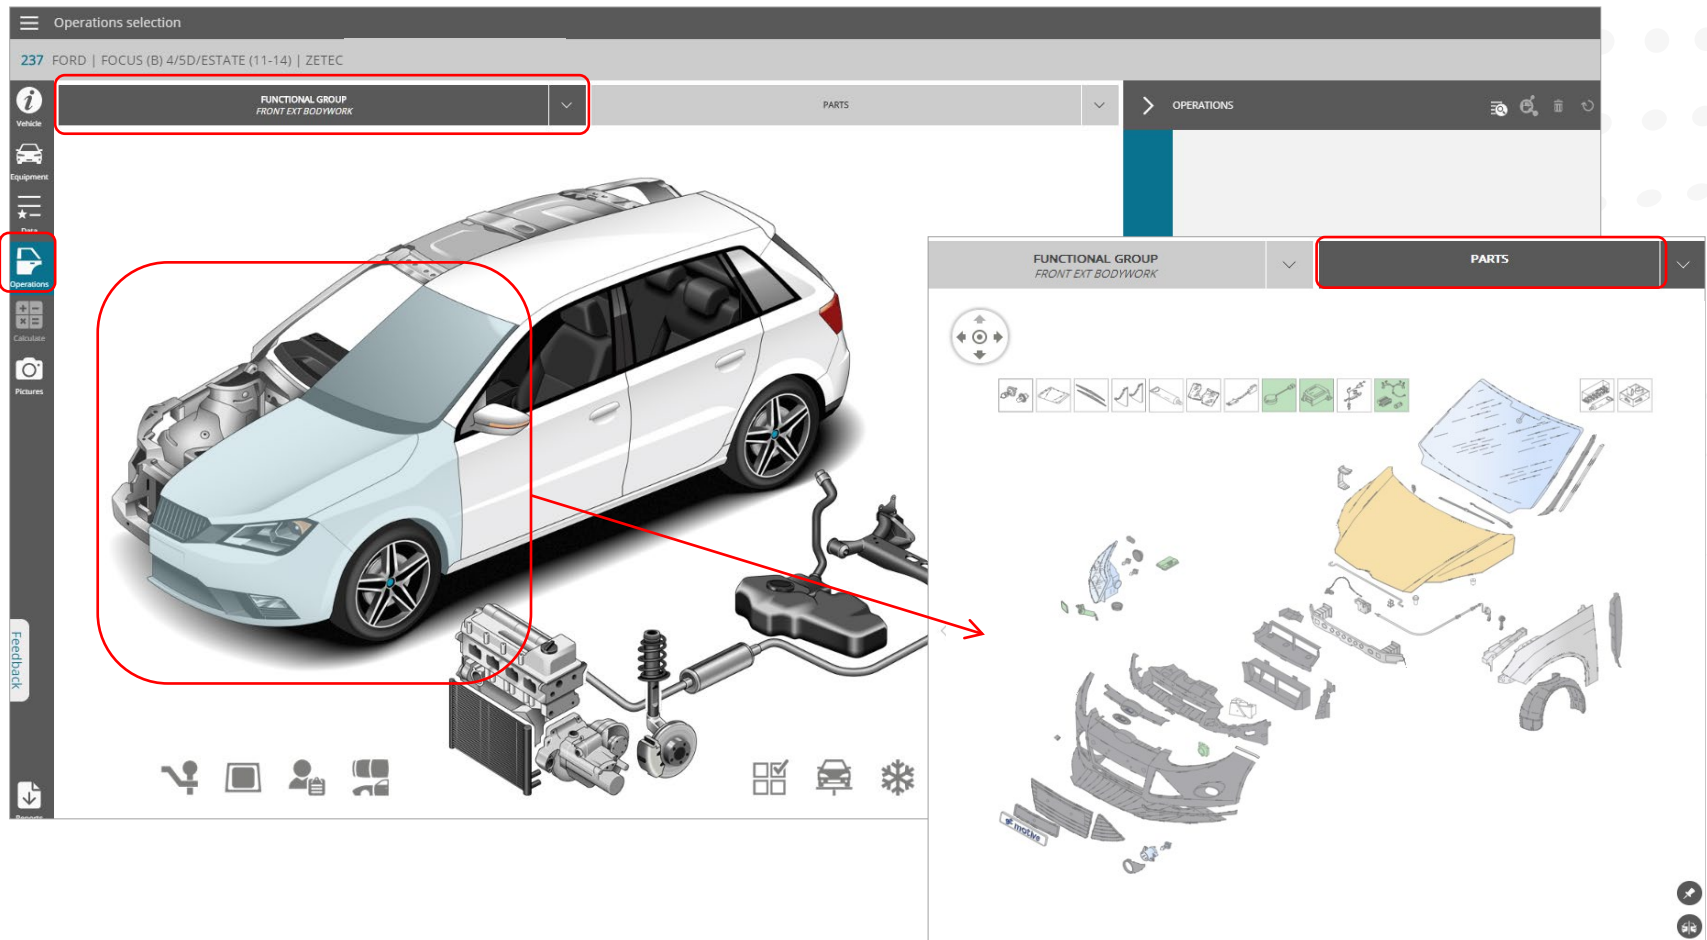

Go to the **"Functional Group"** area and select from the drop down menu which **"Functional Group"** of the vehicle you wish to work with.

Once selected, the parts belonging to that "Functional Group" will be displayed in the main parts selection area:

The Operations Selection Screen

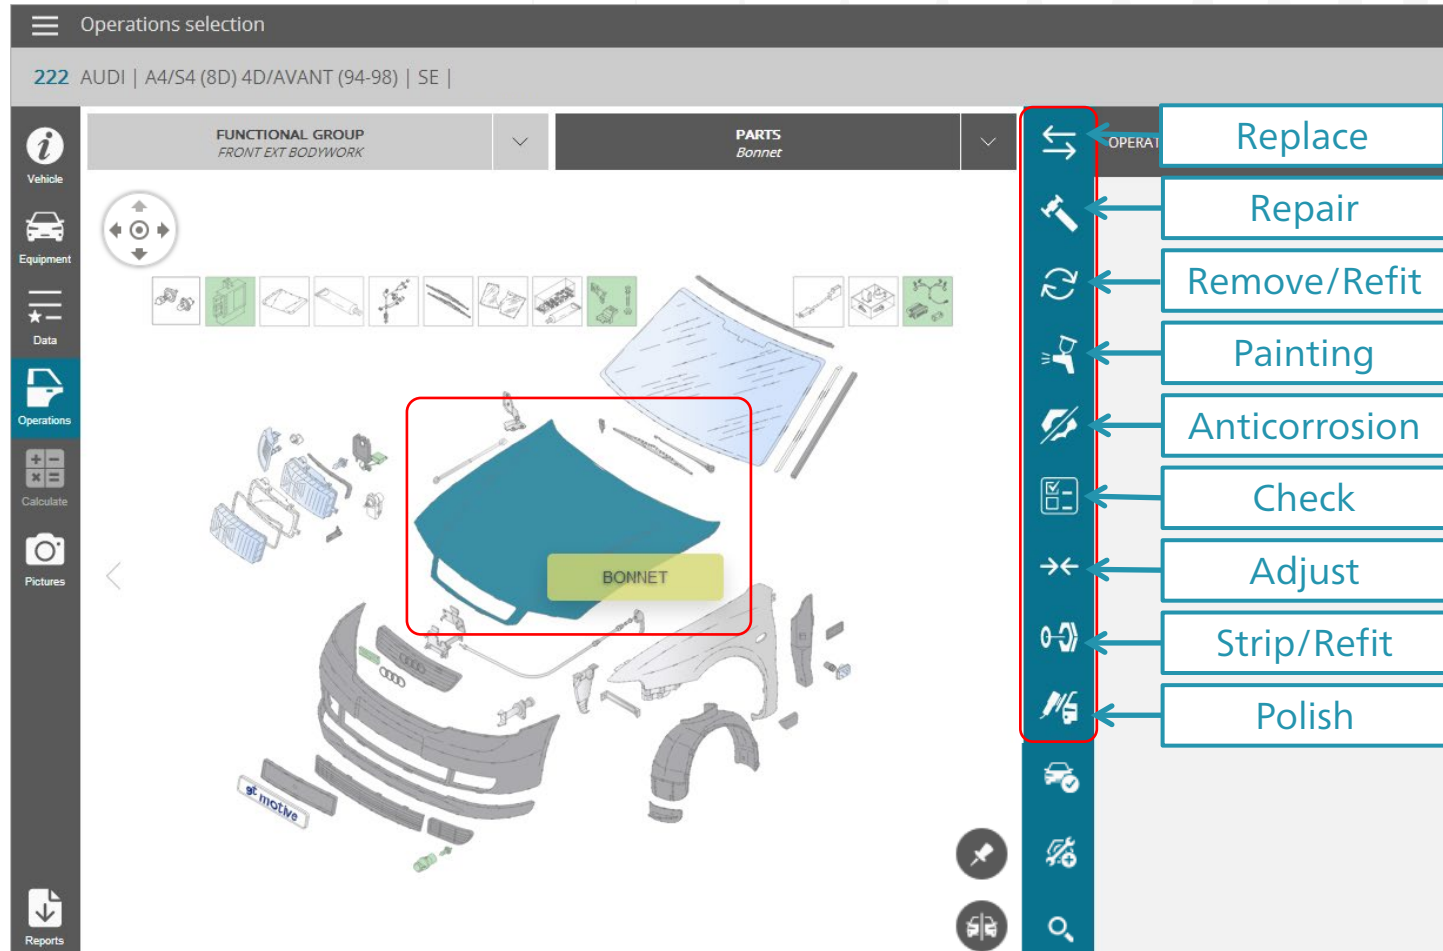

You can also select the **Functional Group** of the vehicle you wish to work with from the graphics. Once selected, the parts belonging to that **"Functional Group"** will be displayed in the main parts selection area:

The Operations Selection Screen

Select the required part, and to the right of the parts selection area you will be able to select what type of operation (task) you wish to carry out on said part: **Replace, repair, remove and refit, painting, anti corrosion treatment, check, adjust, strip/refit, polish, etc...**

The types of operations (tasks) available depends on the part that has been selected.

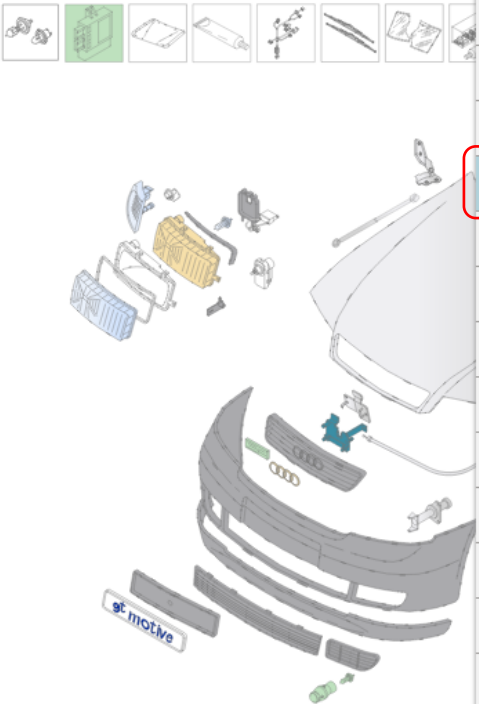

The Operations Selection Screen

You can also select the required part from the drop down menu situated in the column **"Parts"**:

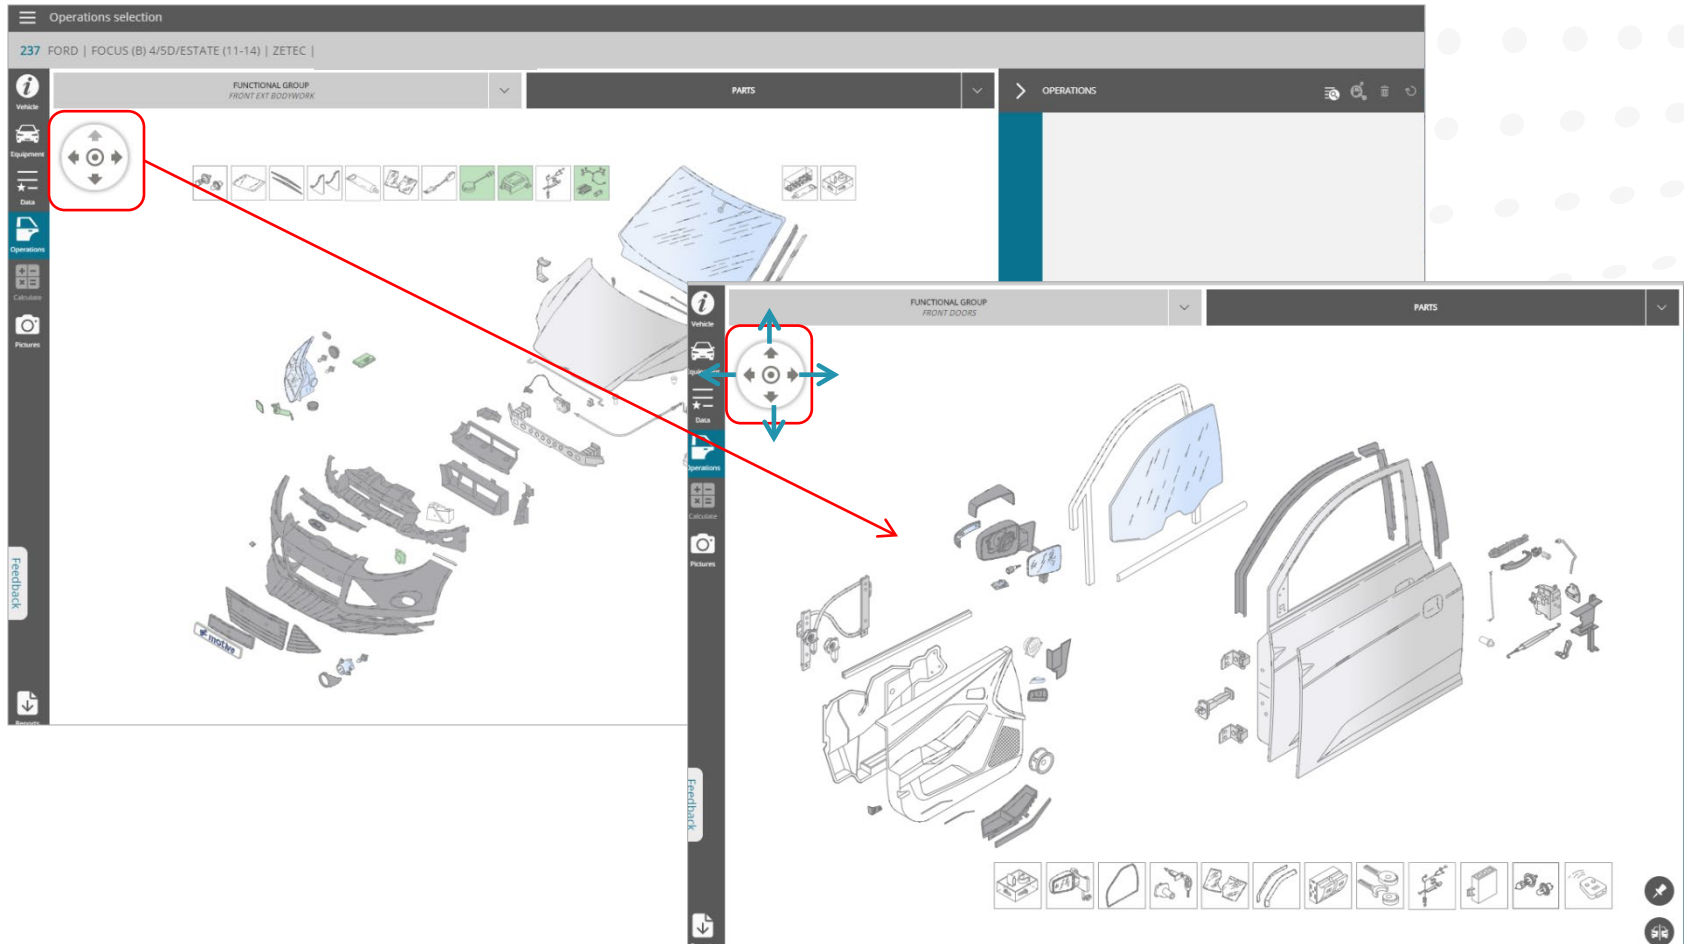

Operations selection

Modifying an Operation

In the **Details** tab, you can modify at this stage any of the operations by clicking on the pencil  icon to the right of each operation line.

A dropdown menu will appear where you can modify such parameters as the **Code**, **Description**, **Quantity** and **Price**:

The screenshot shows the 'Results' screen for a vehicle (222 AUDI | A4/S4 (8D) 4D/AVANT (94-98) | SE |). The 'DETAIL' tab is selected. The table lists parts and operations. A dropdown menu is open for the 'Left headlamp' operation, showing fields for Code, Description, Quantity, Price, I/D, I/D (%), and Depreciation (%).

Code	Description	Quantity	Price	I/D	I/D %	Total

Modifying a Multi-reference

Some parts may have **more than one valid reference/part number (multi-reference)**. In the Results Screen it's possible to change the valid reference/part number for another valid reference/part number by editing the result line.

You will know a part has more than one valid reference/part number because the edit symbol will have some dots underneath: 

Click on said icon to edit the operation line and click on the "..." icon situated to the left of the reference/part number to select a different reference/part number from the **multi-reference** options. Click on the green tick icon to validate:

The screenshot displays a software interface for managing parts. The main table lists parts with columns for Code, Description, Quantity, Price (€), I/D, I/D (%), and Depreciation (%). The third row, '05W30-OEM-VW50000-P1 Engine oil - 05W30 OEM', is highlighted. A red box highlights the 'Calculate' button in the left sidebar. Another red box highlights the '...' icon to the left of the part code. A third red box highlights the 'edit icon with three dots' in the right column of the same row. A fourth red box highlights the 'PART MANAGEMENT' dialog box, which shows a list of multi-reference options: '05W30-OEM-VW50000-P1', '05W40-OEM-VW50200-P3', and '15W40-OEM-VW50101-P2'. A red arrow points from the '...' icon to the first option in the dialog. A fifth red box highlights the green tick icon at the bottom right of the dialog. A sixth red box highlights the green tick icon at the bottom right of the main table.

Reports

You can download and/or print the estimate **report** by clicking on the **"Reports"** icon situated at the bottom left hand corner of the screen.

A slide-out menu will appear where you can select the **language** and what **type of report** you desire. Validate your selection with the green tick icon:

The screenshot displays the software interface for generating a report. On the left, a sidebar contains a 'Generate report' button with a green checkmark icon. Below this, a list of report types is shown, including 'Language', 'Estimate', 'Parts list', 'Photo report', 'Estimate plus photos', 'Customer estimate', 'Customer estimate plus photos', 'Technical report', and 'Technical report plus photos'. A red box highlights the 'Generate report' button and the 'Language' dropdown menu. A red arrow points from the 'Generate report' button to the 'Reports' icon in the bottom left corner of the screen. The main area shows a list of items with columns for 'Description' and 'Quantity'. The 'Reports' icon is located at the bottom left of the screen, next to the 'Results' header.

GT Estimate

User Operations

User Operations

You can add a **User Operation** to an estimate by clicking on the **"User Operations"**  icon at the bottom of the Operations Selection Screen.

There are two tabs; **"User Operations"**, where you can see the list of your previously created User Operations and add them to the estimate:

The screenshot displays the 'Operations selection' interface. At the top, it shows the vehicle information: '222 AUDI | A4/S4 (8D) 4D/AVANT (94-98) | SE |'. Below this, there are two tabs: 'User operations' (highlighted with a red box) and 'Add operation'. The 'User operations' tab contains a table with two rows of operations. The first row is for 'COLLECTION AND DELIVERY' with a labour amount of 0. The second row is for 'ROAD TEST' with a labour amount of 0.3. A red box highlights the 'Operations' icon in the left sidebar. Another red box highlights the 'User Operations' icon in the bottom right corner of the screen. The right sidebar shows a list of operations with details such as 'Replace Engine oil', 'Replace Oil sump cap washer', 'Replace Engine oil', 'Replace Rear emblem engine cubic capacity', and 'Replace Left headlamp'.

Part:	Information:	Id:	Labour Amount:
COLLECTION AND DELIVERY	CONTRACT	0000551733	0

GT Estimate

Uploading Pictures

Photo Gallery

You can add photographs to an estimate by clicking on the **"Pictures"** icon to access the **Photo Gallery**.

Click on **"Upload Images"** to add a photo to the estimate.

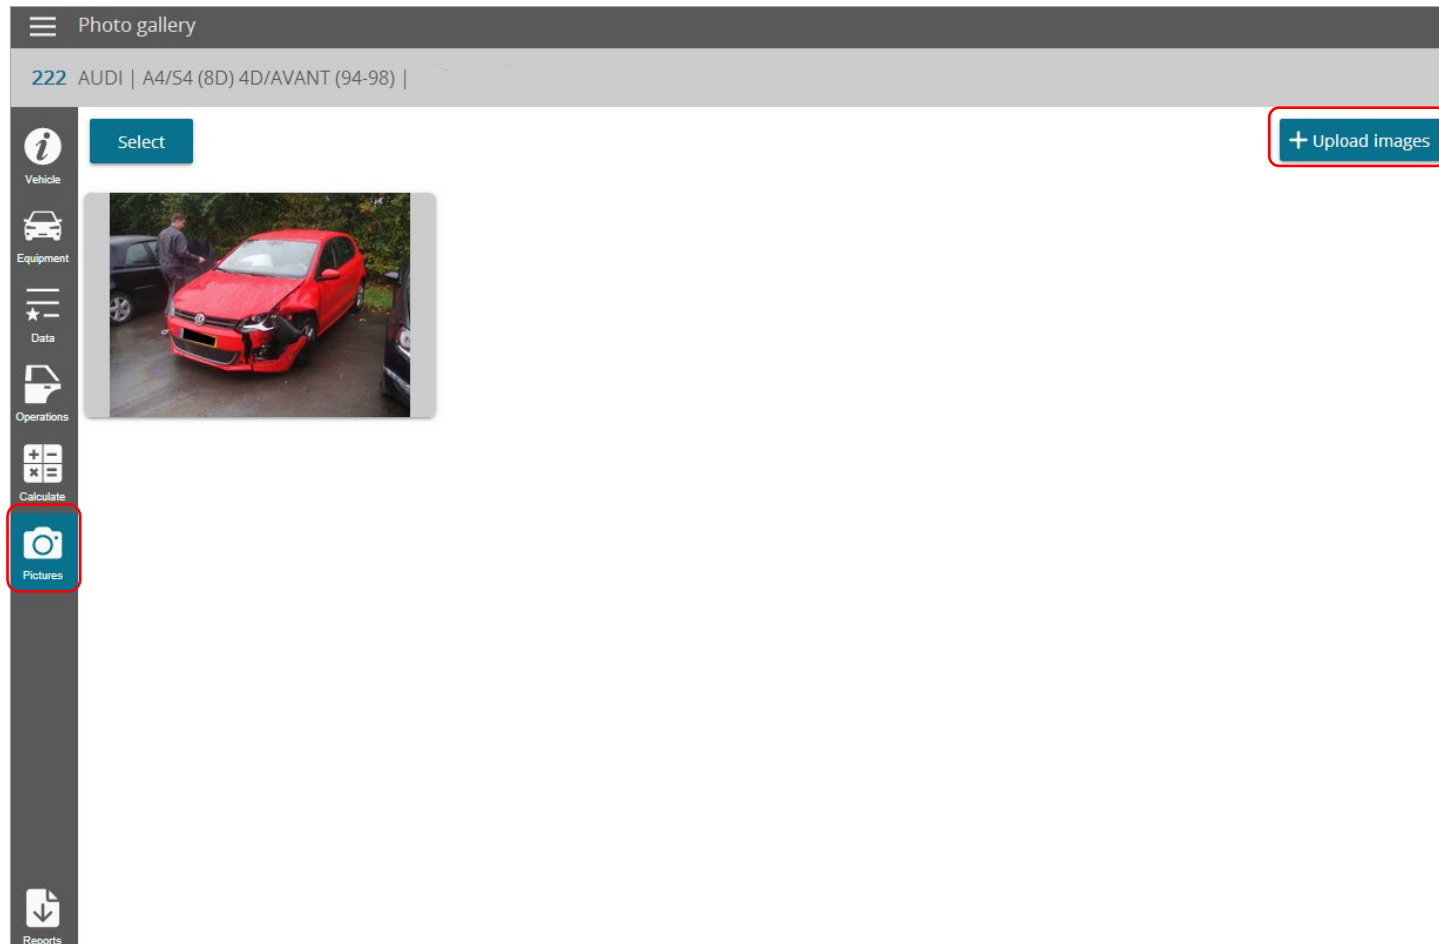

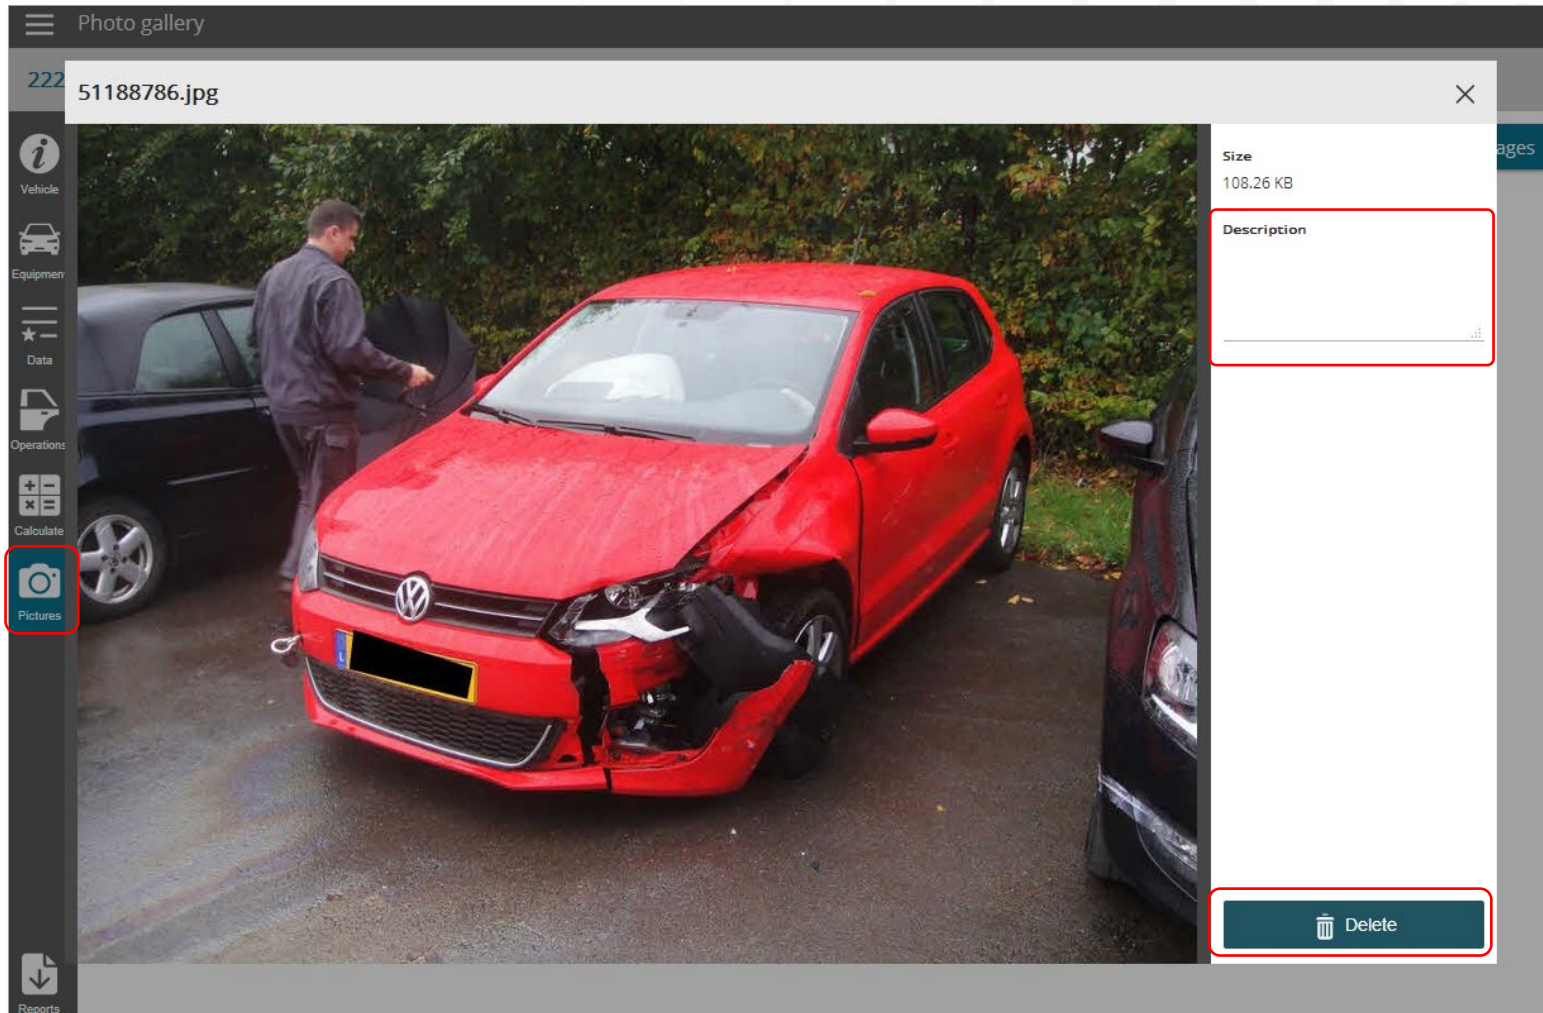

Photo Gallery

By clicking on the thumbnail picture of the photo to enlarge, you can add a **description** of the photo, and **delete** from the estimate if required:

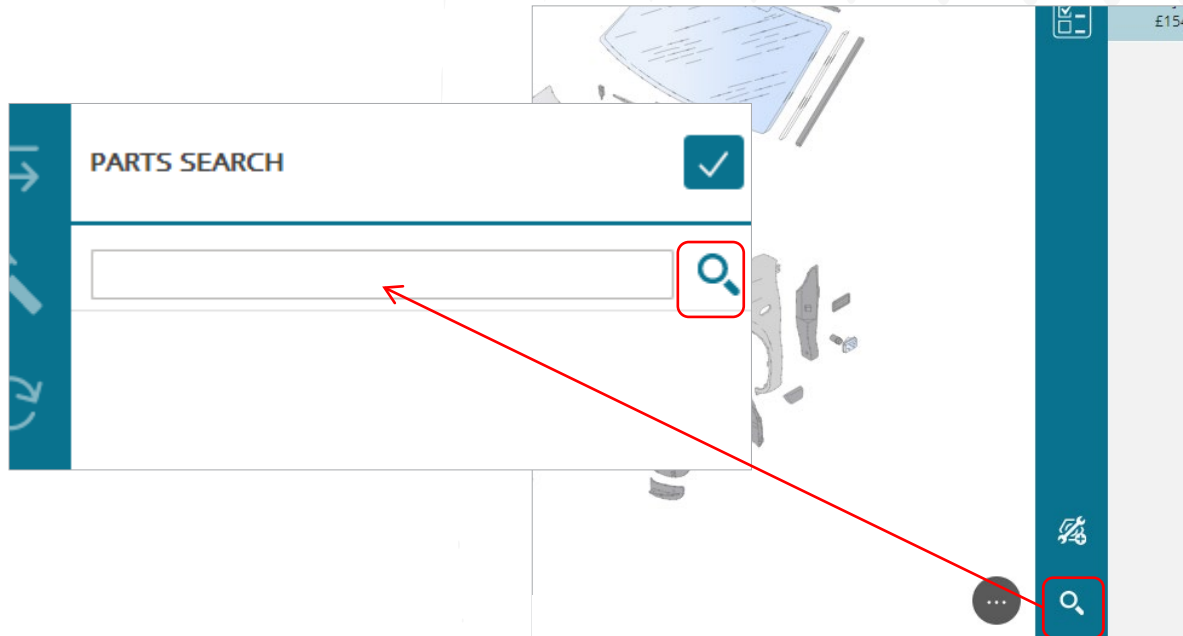

GT Estimate

Other Useful Functions

Parts Search Function

If you are unable to find a part in GT Estimate, you can use the “Parts Search” function situated at the bottom of the Parts Selection Screen.

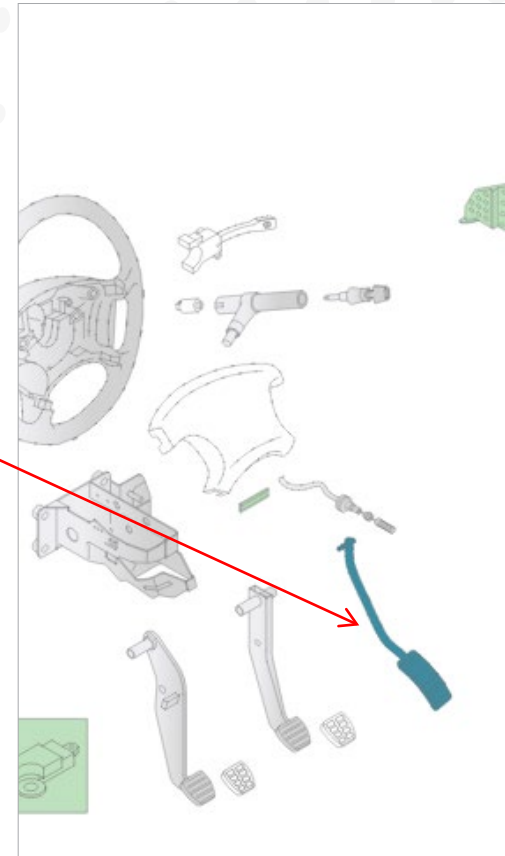

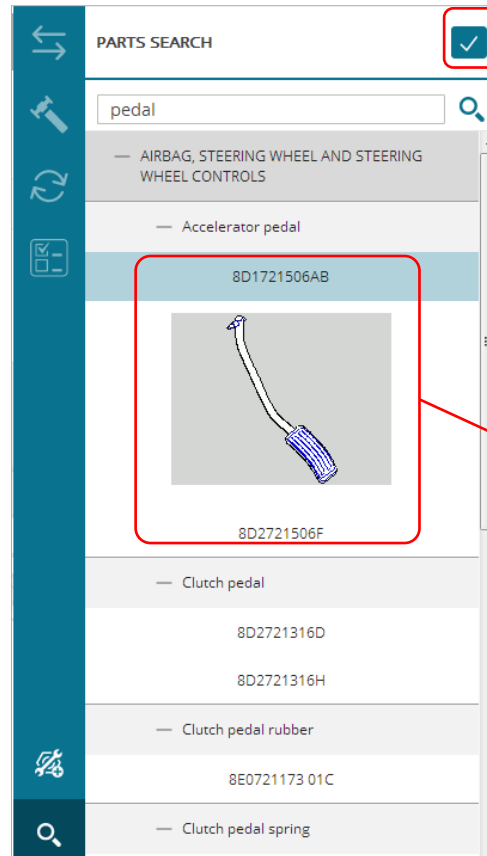

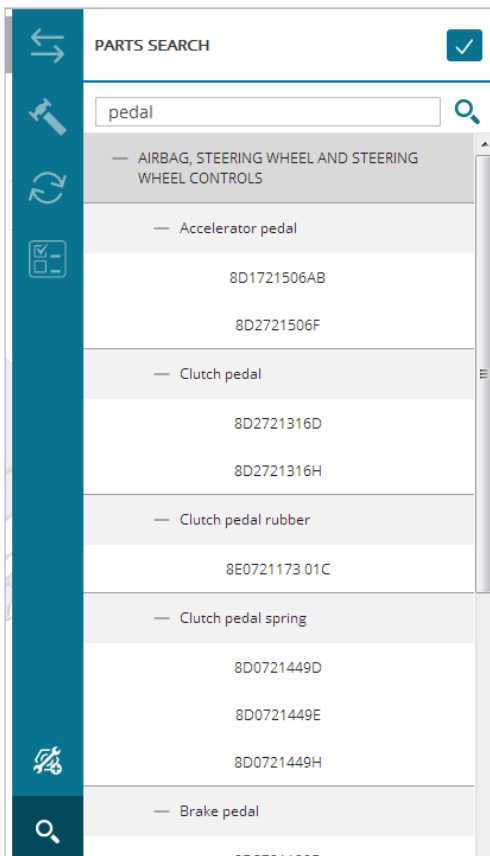

Use this option to search for parts using a description or reference number. Write the complete or portion (4 characters minimum) of the part description or complete reference number in the box and click on the **“Find”** icon.

Parts Search Function

By doing this the user will access the **Parts Search Function** where GT Estimate will list all the parts that include the name you have introduced.

Select the desired part from the list and **GT Estimate** will display a diagram of the part (If available). Validate the selected part you are searching for by clicking on the green tick icon. You will then be led to the functional group where the part is located and it will be highlighted in blue/green colour ready for you to add to the estimate if you so wish.

Equipment Information Source

The User is able to ascertain where the **model equipment information** has been sourced.

The source of the model equipment information can be seen in the **Vehicle Identification Screen** and can be any of the following:

- **Manual:** The User identified the model equipment manually.
- **VIN Decoder:** The model equipment information was obtained from this source.
- **VIN Query:** The model equipment information was obtained from this source.
- **Interface:** The equipment information was obtained through an integration request from another platform.

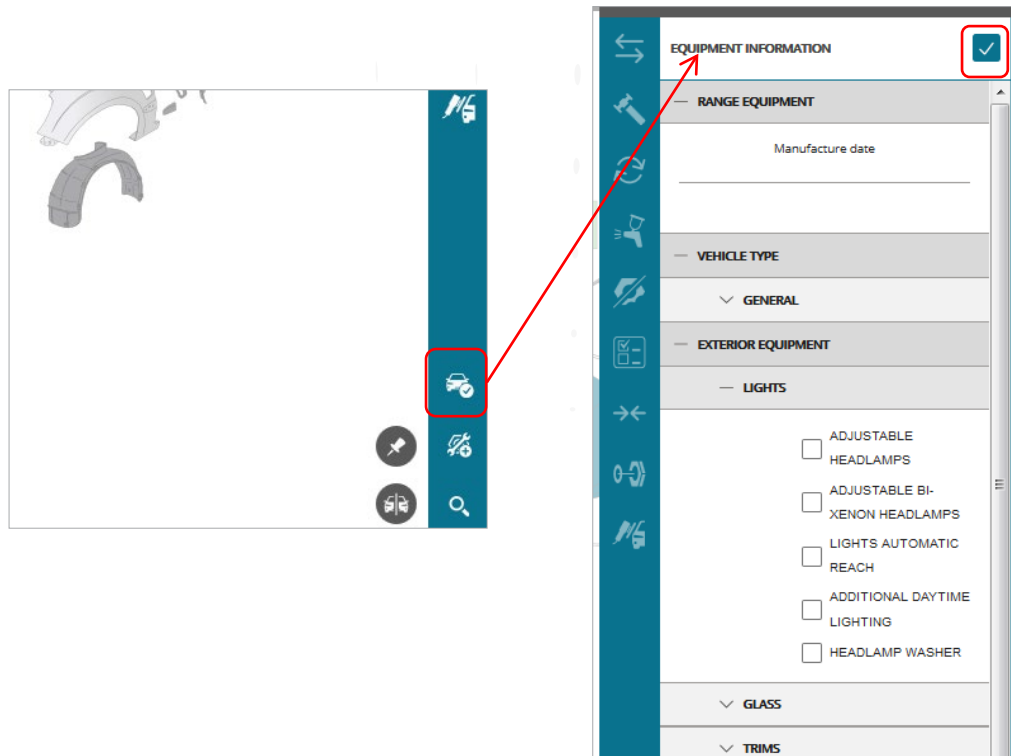

The screenshot displays the 'Vehicle Identification Screen' in a web application. The top navigation bar is labeled 'Information'. Below it, the vehicle details are shown: '222 AUDI | A4/S4 (8D) 4D/AVANT (94-98) | SE'. A sidebar on the left contains icons for 'Vehicle', 'Equipment', 'Data', 'Operations', 'Calculate', and 'Pictures'. The 'Vehicle' icon is highlighted with a red box. The main form area contains fields for 'ID *' (value: 222), 'USER CODE *' (value: CUSTOMER GT MOTIVE ENGLAND - mpena - GtEstimate), and 'REFERENCE'. Below these fields, a row is highlighted with a red box, showing 'VEHICLE - AUDI - A4/S4 (8D) 4D/AVANT (94-98) - SE - AU00402' and a blue icon with the text 'Source: VinQuery'. At the bottom, there are fields for 'REG. NO *' (value: GK61XXX) and 'VIN' (value: WF0K0000000000000000). A small image of a dark blue Audi A4/S4 is visible in the bottom right corner.

Active Group

When a user selects a functional group the Dynamic Composition (Graphics) that are displayed depends on the selected equipment.

There is a way to review and check the equipment items that have an influence on the functional group the User is working with by clicking on the **"Active Group"** Icon.

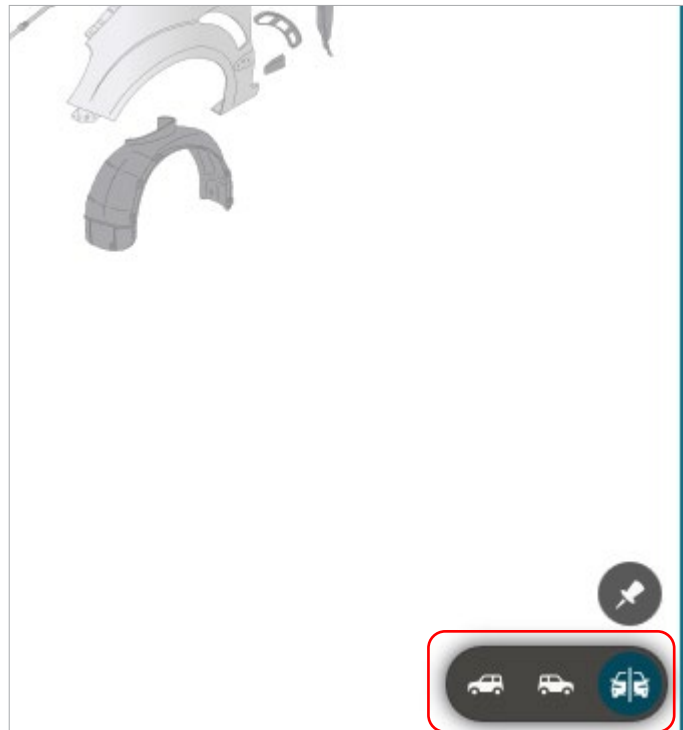

Once the equipment has been reviewed/modified, click on the Green tick icon to validate the Active Group:

| Laterality Function

You can also use the **“Laterality” Function**. Use this function to lock which side of the vehicle you wish to work with.

Only those parts belonging to the locked side will be made available to avoid any possible mistakes:

Custom Fields

In the **"Custom Fields"** section of the **"Data"** area of the estimate, the User can add further information to the estimate in the fields that have been previously created for the customer*:

The screenshot displays the GT Motive software interface. At the top, a header bar shows 'More Info' and the vehicle details: '223asdada FORD | S-MAX (WS) (06-15) | TITANIUM TDCI'. On the left sidebar, the 'Data' menu item is highlighted with a red box. Below it, the 'Custom fields' button is also highlighted with a red box. The main content area is titled 'Additional Comments' and contains three text input fields. The first field is empty. The second field contains the text 'Other Information'. The third field contains the text 'Report Introduction'. To the right of these fields, there is a pre-filled text block: 'Dear Sir/Madam, Please find below the estimate as requested by your Insurance provider'. The interface includes a 'Favourites' star icon on the right sidebar and a 'Regional settings' button at the bottom of the sidebar.

*: These fields must be previously enabled and created by GT Motive (Only available to certain clients).

Base Model Function

The **"Base Model"** function allows the user to create an estimate for a vehicle that is not available in the GT Motive model data base by using the information from another model.

Identify the model you wish to use as a Base Model and click on the **"Base Model"** function:

Information

223asdasda FORD | S-MAX (WS) (06-15) | TITANIUM TDCI |

Vehicle

USER CODE * CUSTOMER GT MOTIVE ENGLAND - mpena - GREstimate

REFERENCE

VEHICLE - FORD - S-MAX (WS) (06-15) - TITANIUM TDCI - FR02301 Source: VinDecoder

REG. NO *

VIN

MAKE * FORD

MODEL * S-MAX (WS) (06-15) (***)

Add make and base model ☒

MAKE INNOCENTI

MODEL A112

MILES 0

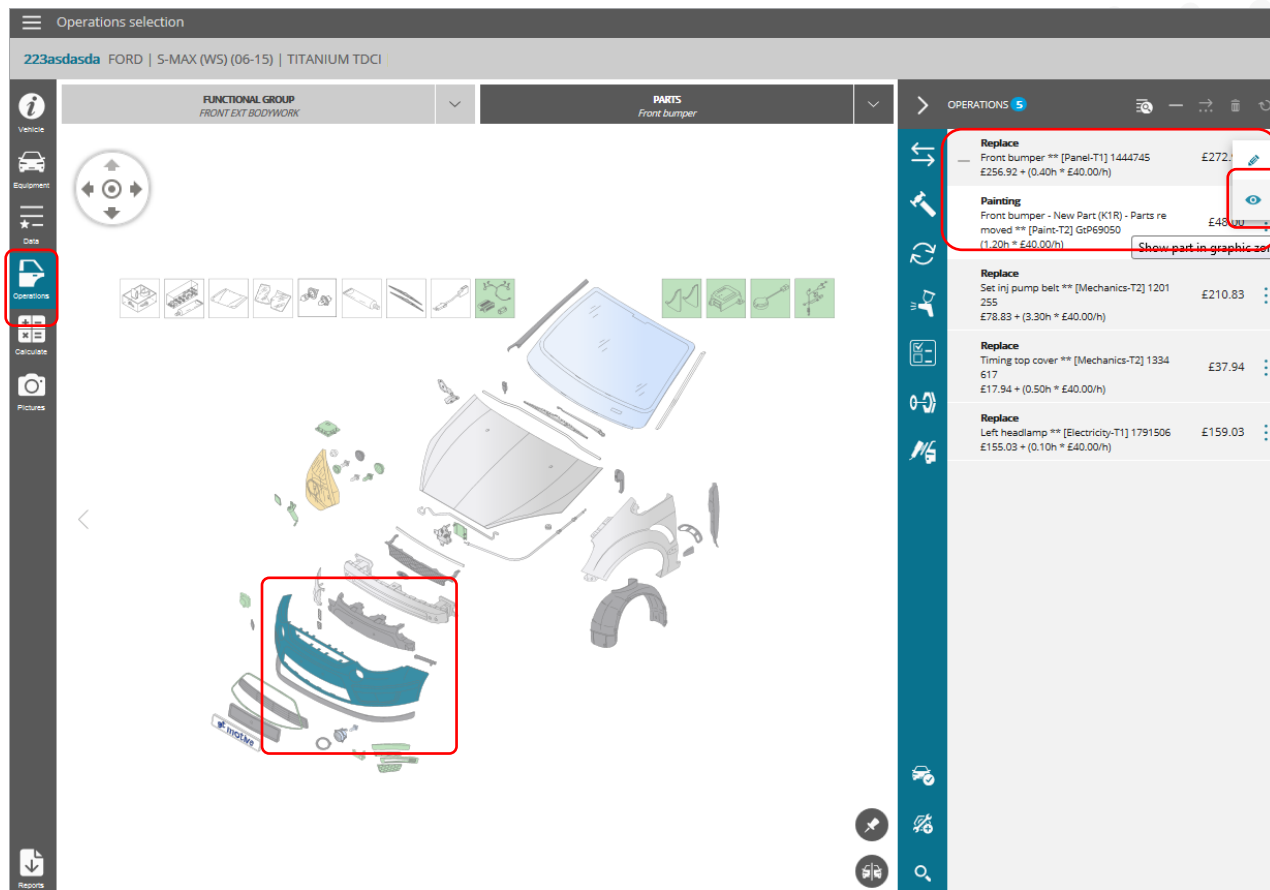

Once the real make and model of the vehicle has been introduced you can continue with the estimate creation process as usual.

Locate Part in Graphics

This function allows the User to locate in the **Dynamic Composition (Graphics)** a part associated to an operation that they've already included in the estimate.

If a User has included an operation in the estimate but wants to return to that Functional Group or locate it again in the graphics, they can click on the **"Show part in graphic zone"** icon of the operation . You will then be lead to the functional group where the part is located and it will be highlighted in a blue/green colour:

Find Related Operations

This function allows the User to select a part in the **Dynamic Composition (Graphics)** and by clicking on the **“Search Part in Operations List”** icon, the User will be able to filter in the Operations List all those operations related to said part. If we click on the same icon again the rest of the operations will appear again in the list.

The screenshot displays the 'Operations selection' window for a vehicle. The top bar shows the vehicle information: '223asdada FORD | S-MAX (WS) (06-15) | TITANIUM TDCI |'. Below this, there are tabs for 'FUNCTIONAL GROUP' (FRONT EXT BODYWORK) and 'PARTS' (Front bumper). The main area shows a 3D exploded view of the front bumper assembly. A red box highlights a specific bumper part. On the right, the 'OPERATIONS' list is shown, with a red box highlighting the 'Replace' and 'Painting' operations for the selected part. The 'Replace' operation is listed as 'Front bumper ** [Panel-T1] 1444745' with a cost of £272.92 and a time of 0.40h * £40.00/h. The 'Painting' operation is listed as 'Front bumper - New Part (K1R) - Parts re moved ** [Paint-T2] GtP69050' with a cost of £48.00 and a time of 1.20h * £40.00/h. The left sidebar contains icons for 'Vehicle', 'Equipment', 'Operations' (highlighted with a red box), 'Calculate', 'Pictures', and 'Reports'.

Operation	Cost	Time
Replace Front bumper ** [Panel-T1] 1444745	£272.92	0.40h * £40.00/h
Painting Front bumper - New Part (K1R) - Parts re moved ** [Paint-T2] GtP69050	£48.00	1.20h * £40.00/h

Hide "Child" Operations

This function allows the User to hide and deploy those **"child"** operations that are included within a **main "parent" operation** included in the estimate operations list:

The screenshot displays the 'Operations selection' interface for a vehicle. The top bar shows the vehicle details: 223asdasda, FORD | S-MAX (WS) (06-15) | TITANIUM TDCI. The left sidebar contains icons for Vehicle, Equipment, Data, Operations (highlighted with a red box), Calculate, Pictures, and Reports. The main area is divided into two sections: 'FUNCTIONAL GROUP MAINTENANCE' and 'PARTS 40000-kilometer Inspection Service'. The 'FUNCTIONAL GROUP MAINTENANCE' section shows a grid of 18 icons representing different maintenance intervals from 20,000 Km to 300,000 Km. The 'PARTS 40000-kilometer Inspection Service' section shows a grid of 6 icons representing different parts. The right sidebar shows a list of operations, with the '40000-kilometer Inspection Service ** [Mechanics-T2] MAINTENANCE' operation selected and highlighted with a red box. This operation is expanded, showing a list of child operations including 'Replace Front bumper ** [Paint-T2]', 'Painting Front bumper - New moved ** [Paint-T2]', 'Replace Set inj pump belt ** 255', 'Replace Timing top cover ** 617', 'Replace Left headlamp ** [Electricity-T1] 1791506', 'Replace Oil filter ** 1807516', 'Replace Antipollen filter - New ** 1315687', and 'Replace Engine oil ** MATERIALS (5.60 * £15.00)'. The 'Operations' tab is also highlighted with a red box.

FUNCTIONAL GROUP	PARTS

Replace Oil filter ** 1807516 £12.56	
Replace Antipollen filter - New ** 1315687 £16.85	
Replace Engine oil ** MATERIALS (5.60 * £15.00)	£84.00

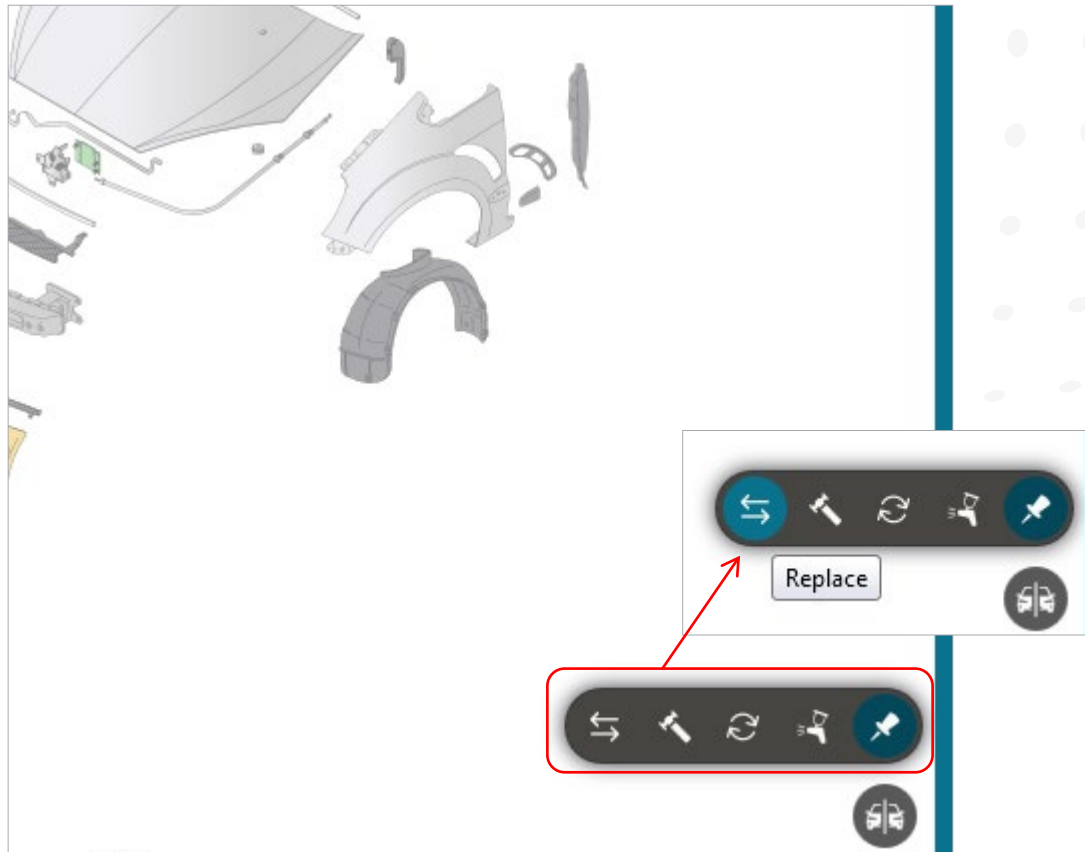

Hide Operations List

The User can **collapse and deploy** the **Operations List** to maximise the view of the Dynamic Composition (Graphics):

Task Lock Function

The User can **"lock"** a certain task so that when a part is selected it will be immediately included in the estimate with that task. Tasks that the user can lock are: **Replace, Repair, Remove and refit** and **Paint**:

GT Estimate

Additional Information

Door Skin Paint Preparation (UK Only)

Door Skin UK Allowance

Following extensive market research and discussions with our technical panel, we have made the following adjustments to the labour calculations for the fitment of full and half door skins, (bolt on Door skins are excluded from the uplift).

An uplift of 30 minutes (0.5 hr) has been applied to allow for the additional preparation time on Full and Half Door skins when selecting a replacement panel.

An additional uplift of 18 minutes (0.30 hr) has been applied for the application of seam sealer for Alfa Romeo and Fiat models, due to this operation not being covered in their published labour allowance.

AZT Paint and Material costs remains unchanged, this uplift is a supplement to the published AZT time.

Any application of Bonding Kits and Additional Materials will remain at the discretion of the user and should be in agreement with work providers guidelines as no allowance is made within GT Estimate or the sundry charge calculation.

April 2017.
